

DS351L - Data Visualization Lab

Lab 08

9th April 2026

Task

You are given an image of a soccer field. Your task is to:

1. Generate XY coordinates for different player positions using CBI Studio.
<https://cbistudio.interworks.com/>
2. Create a dataset that includes:
 - Player name
 - Position category (defender, midfielder, forward, etc.)
 - X coordinate
 - Y coordinate
 - Salary (your own made-up values)
3. Import the dataset into Tableau.
4. Plot player positions on top of the soccer field image.
5. Use color, size, labels, and filters to produce an interactive player-position salary visualization.
6. Analyze and interpret the field layout and salary patterns.

You can also save the image via: <https://share.google/images/Fmq46n3p0mn7VoDWH>

Positions to Include

You must map these 10 player roles:

1. Keeper
2. Center Back 1
3. Center Back 2
4. Right Back
5. Left Back
6. Defensive Mid
7. Attacking Mid
8. Right Wing
9. Left Wing
10. Striker 1
